

Jing-Zhang Evidence Rail

P1 • Scope overview

Legend

- Design scope (provisional)
- JZ rail alignment
- Metro
- Green (approx. corridor, prov.)
- Key-area boundary

Key metrics

Design scope $\approx 11.41 \text{ km}^2$ (provisional)

Corridor $1.44 \times 10.49 \text{ km}$ (aspect 0.14)

3 key areas • 2491 POIs (aggregated, study area)

77 metro stations (AMap-sourced)

Three key areas

Zhongzhiyuan

Cultivation core • OPC/nano-co. capacity • JZ-07

AI Origin

Industry core • near-campus transfer • Origin Tower

Dazhongsi

Living core • residential • slow mobility first

Key: EBIP • H3 res8/9/10 + AMap POI/metro • see proposal.md

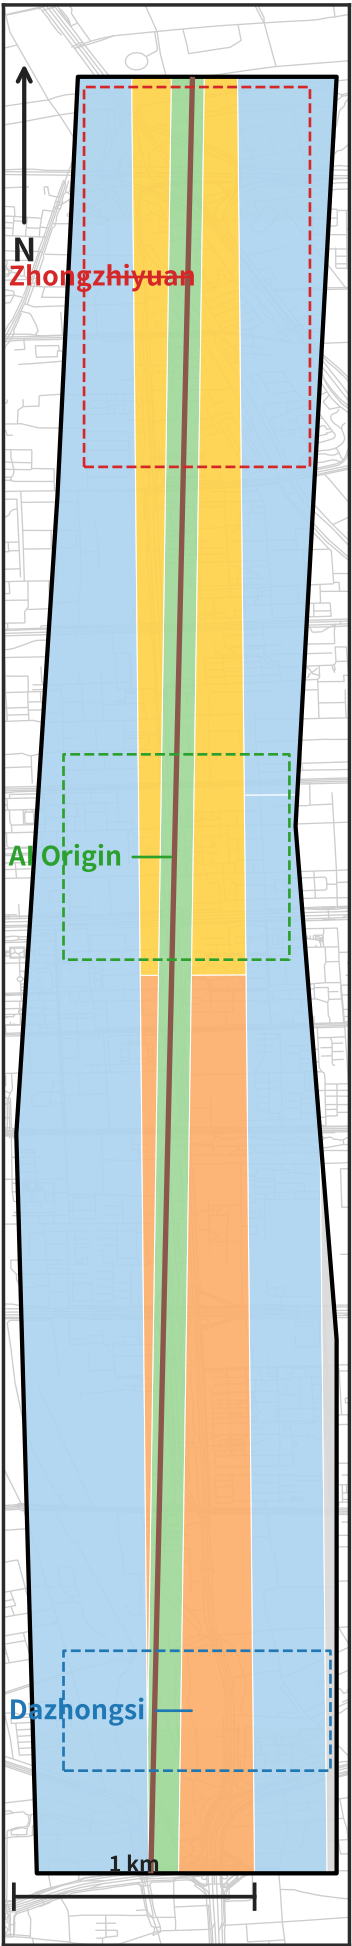

Basemap © OpenStreetMap (ODbL): display only, not a planning reference

License: pkg COMMUNITY-DISPLAY-ONLY • embedded Switchback Protocol spec CC-BY-4.0 (chucky1102), layered not mixed

Provisional geometry (non-official); organizer polygon to replace & recompute

Jing-Zhang Evidence Rail

P2 • Land-use structure

Legend

- R&D / industry 0802
- Green / blue-green 1401
- Commercial service 05
- Residential 07 (yellow)
- TBD (to be defined) 16
- JZ rail
- Key-area boundary

Key metrics

Land use (agent-inferred blocks, provisional)

0802 6.96km² • 1401 1.33km² • 05 1.47km² • 07 1.47km² • 16 0.18km²

Dominant: R&D/industry 0802 • residential 07 (yellow)

Legend: 5 codes • area by intersection with site geometry

Three key areas

Zhongzhiyuan

Cultivation core • OPC/nano-co. capacity • JZ-07

AI Origin

Industry core • near-campus transfer • Origin Tower

Dazhongsi

Living core • residential • slow mobility first

Key: EBIP • H3 res8/9/10 + AMap POI/metro • see proposal.md

Basemap © OpenStreetMap (ODbL): display only, not a planning reference

License: pkg COMMUNITY-DISPLAY-ONLY • embedded Switchback Protocol spec CC-BY-4.0 (chucky1102), layered not mixed

Provisional geometry (non-official); organizer polygon to replace & recompute

Jing-Zhang Evidence Rail

P3 • Three key areas POI

Legend

- Research
- Commercial
- Green
- Residential
- Industry
- Medical
- Key-area boundary
- JZ rail

Key metrics

AI Origin 118 • Dazhongsi 38

Zhongzhiyuan 16 • total 2491 POIs

Data: AMap Open Platform aggregate (raw details not redistributable)

Coords: AMap GCJ-02 → WGS-84

Three key areas

Zhongzhiyuan

Cultivation core • OPC/nano-co. capacity • JZ-07

AI Origin

Industry core • near-campus transfer • Origin Tower

Dazhongsi

Living core • residential • slow mobility first

Key: EBIP • H3 res8/9/10 + AMap POI/metro • see proposal.md

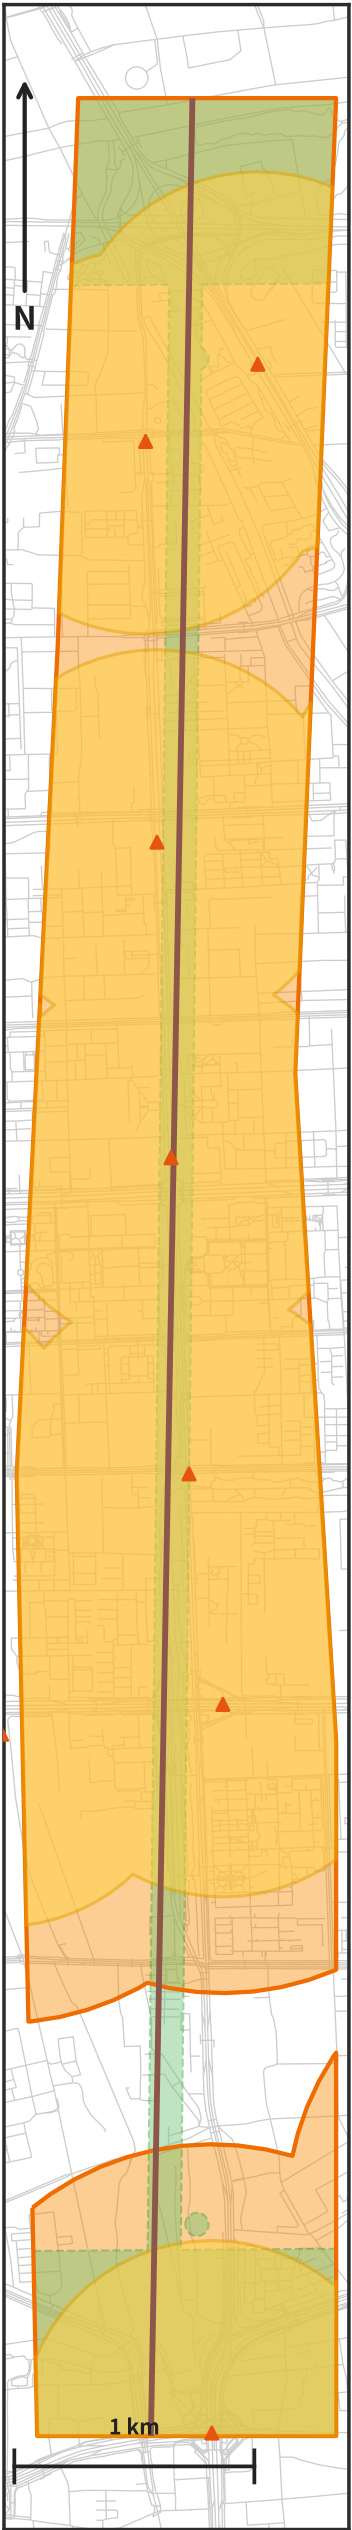

Basemap © OpenStreetMap (ODbL): display only, not a planning reference

License: pkg COMMUNITY-DISPLAY-ONLY • embedded Switchback Protocol spec CC-BY-4.0 (chucky1102), layered not mixed

Provisional geometry (non-official); organizer polygon to replace & recompute

Jing-Zhang Evidence Rail

P4 • Slow mobility & metro coverage

Legend

- Public space / green
- Metro 1200m (orange)
- Metro 800m (yellow)
- JZ rail
- Metro

Key metrics

Metro 800m coverage 76.3% • 1200m 92.7% (verified)

Layers: public space (green) + metro 1200m (orange) + 800m (yellow)

Walk-first + rail-anchored + bike network + shared feeder

Complete-street principle • continuous accessibility

Three key areas

Zhongzhiyuan

Cultivation core • OPC/nano-co. capacity • JZ-07

AI Origin

Industry core • near-campus transfer • Origin Tower

Dazhongsi

Living core • residential • slow mobility first

Key: EBIP • H3 res8/9/10 + AMap POI/metro • see proposal.md

Basemap © OpenStreetMap (ODbL): display only, not a planning reference

License: pkg COMMUNITY-DISPLAY-ONLY • embedded Switchback Protocol spec CC-BY-4.0 (chucky1102), layered not mixed

Provisional geometry (non-official); organizer polygon to replace & recompute

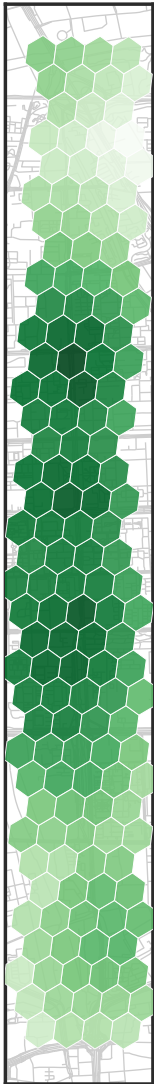

Jing-Zhang Evidence Rail

P5 • Evidence panel (H3 res9)

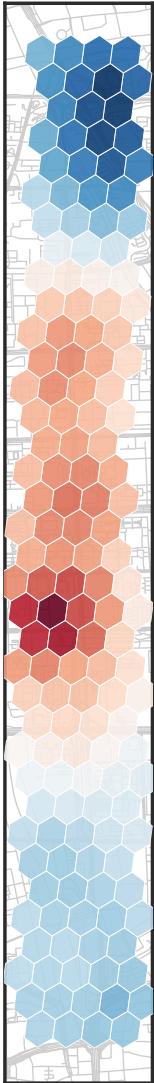

AI industry suitability (Moran I=0.874)

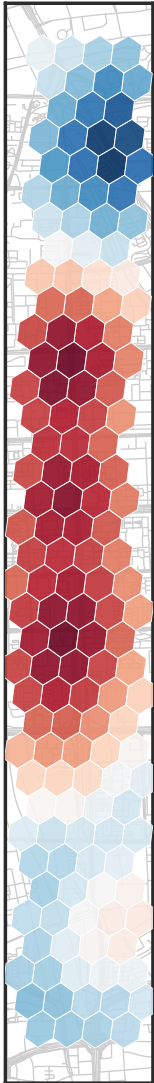

Daily-life sufficiency (Moran I=0.932)

Gi* industry hotspot (Hot 37 • Cold 24 • NS 90)

Gi* life hotspot (Hot 48 • Cold 36 • NS 67)

Evidence notes

AI industry suitability su_industry

H3 res9: industry POI kernel density × industry-chain completeness × metro accessibility. Higher = more suitable.

Life service sufficiency su_resident

H3 res9: commercial/medical/green/education/dining density + walking accessibility to residents/offices.

Gi* industry hot/cold spots

Getis-Ord Gi* z-score clusters: Hot = significant high, Cold = significant low, NS = not significant.

Gi* life hot/cold spots

Same as above, on the daily-life services dimension.

Reproducible metrics

Moran I industry 0.874 • life 0.932 (significant spatial autocorrelation)

Gi* industry: Hot 37 • Cold 24 • NS 90

Gi* life: Hot 48 • Cold 36 • NS 67

H3 res8/9/10 • recompute: pipeline_150.py

Key: EBIP • H3 res8/9/10 + AMap POI/metro • see proposal.md

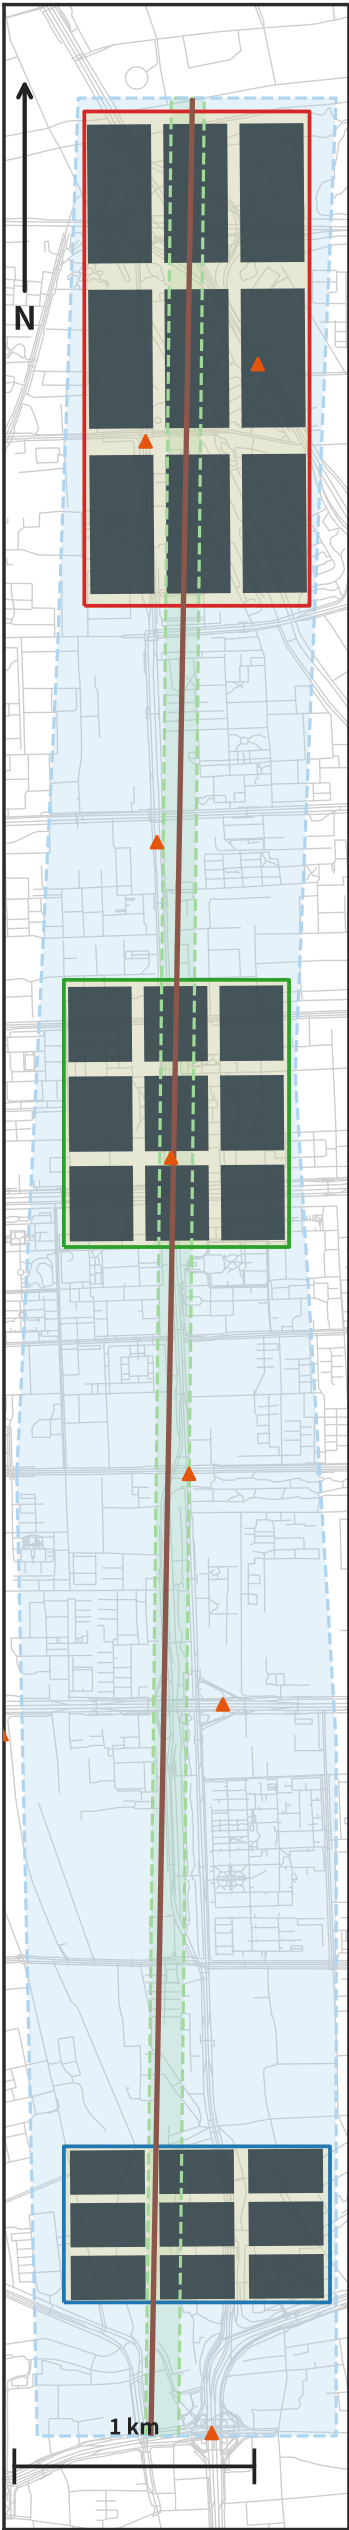

Basemap © OpenStreetMap (ODbL): display only, not a planning reference

License: pkg COMMUNITY-DISPLAY-ONLY • embedded Switchback Protocol spec CC-BY-4.0 (chucky1102), layered not mixed

Provisional geometry (non-official); organizer polygon to replace & recompute

Jing-Zhang Evidence Rail

P6 • Implementation figure-ground

Legend

- Building fabric (figure-ground)
- Near-term PHASE-1
- Mid-term PHASE-2
- Long-term PHASE-3
- Key-area boundary
- JZ rail
- Metro

Key metrics

27 buildings (figure-ground approx., provisional)

Street network from OSM (6535 segments, display-only)

Phasing: near-term PHASE-1 • mid-term PHASE-2 • long-term PHASE-3

Interfaces/breakpoints: building mass & street voids reveal block structure

Three key areas

Zhongzhiyuan

Cultivation core • OPC/nano-co. capacity • JZ-07

AI Origin

Industry core • near-campus transfer • Origin Tower

Dazhongsi

Living core • residential • slow mobility first

Key: EBIP • H3 res8/9/10 + AMap POI/metro • see proposal.md

Basemap © OpenStreetMap (ODbL): display only, not a planning reference

License: pkg COMMUNITY-DISPLAY-ONLY • embedded Switchback Protocol spec CC-BY-4.0 (chucky1102), layered not mixed

Provisional geometry (non-official); organizer polygon to replace & recompute
